### Software Skills:

- HTML, CSS
- JAVA SCRIPT
- REACTJS
- CAED , SOLID WORKS, SOLID EDGE
- MS OFFICE, MS Dynamics

## PROFESSIONAL EXPERIENCE

March 2021- current 2025 (4.4 years)

### **Precision IT and Tech ManPower Services.**

- Making UI/UX design mockups (from designers) and converting them into high-quality, functional web pages and interactive components using HTML, CSS, and React.js.
- Creating reusable UI components (in React) that can be used across different parts of the application, promoting consistency and efficiency.
- Managing the application's data and state using React's built-in state management or libraries like Redux, Context API, or Zustand, ensuring data flows correctly and consistently.
- Optimizing the front-end code (HTML, CSS, JavaScript, React components) for maximum speed and efficient resource usage, leading to faster page load times and a smoother user experience. This includes techniques like code splitting, lazy loading, image optimization, and efficient rendering.
- Keeping up-to-date with the latest trends, best practices, and advancements in HTML, CSS, JavaScript, and the React ecosystem (e.g., new React features, state management libraries, build tools).

- Producing well-structured, readable, and maintainable code following best practices and company coding standards.
- Creating modular and reusable components and functions to improve development efficiency and consistency.
- Using version control systems like Git to manage code, collaborate with team members, and track changes.
- Creating and maintaining technical documentation for the front-end codebase, explaining how components work and how to use them.

Sept 2019- February 2021 (1.5 years)

**Belgaum Aqua Valves PVT. Ltd**

- Design and development of different fluid based valves.
- Creation of casting and machining Drawings as per API Standards.
- Manual creation of Purchase Requisition and forwarding it for validation and approval
- Creation/edit/change of designing based master data for organization.

---
